PROFESSIONAL SUMMARY

Full Stack Developer with well-rounded, hands-on experience across the full software lifecycle, from database design to UI, API, testing, and deployment. Comfortable building backend services in both Java (Spring Boot) and Python, developing responsive frontends with React and JavaScript, and working across databases including PostgreSQL, MongoDB, MySQL, and Redis. Skilled in RESTful API design, JWT authentication, role-based access control, and microservices, with practical experience in automated testing (JUnit, Mockito, JaCoCo), Docker-based deployment, and Agile, Git-based CI/CD. Also applies Python to data analysis and machine learning, including model building and evaluation for real-world problems. A quick learner with a strong foundation in clean architecture and problem-solving. Seeking a Full Stack Developer, Backend Developer, or Software Engineer role.

CORE SKILLS

Backend Development: Java 17, Spring Boot 3.2, Spring Security, Spring Data JPA, Python, Node.js, Express.js, RESTful APIs, JWT Authentication, Microservices, RBAC

Frontend Development: ReactJS, React Hooks, React Router, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Vite, Axios, Responsive Design

Databases & Caching: PostgreSQL, MySQL, MongoDB, MS SQL Server, SQLite, Redis (Caching), Flyway

Testing & Quality: JUnit 5, Mockito, JaCoCo, Postman, API Testing, Debugging, Code Review

DevOps & Tools: Docker, Docker Compose, Git, GitHub, CI/CD, Maven, Swagger/OpenAPI, Agile/Scrum, SDLC

Other: Machine Learning (Python, scikit-learn, KNN, CNN, Logistic Regression), Data Structures & Algorithms, OOP, MVC, Cloud Computing

EXPERIENCE

Full Stack Developer Intern

Feb 2026 – May 2026

Edufu Technologies Pvt. Ltd. (CampusPe) — Remote, Bengaluru

- Built 12+ RESTful APIs with JWT authentication and role-based access control (RBAC) for a stateless, secure architecture, using Java, Spring Boot, and Spring Security.
- Added Redis caching to cut database load, and automated daily email reminders using scheduled jobs and email templates.
- Deployed a 5-service application stack (backend, frontend, database, cache, AI service) in Docker with health checks for reliable startup.
- Wrote unit and integration tests reaching 75% code coverage using JUnit 5 and Mockito; built centralized error handling for consistent API responses.
- Documented all APIs with Swagger/OpenAPI, and followed Agile, Git-based CI/CD workflows with daily commits, pull requests, and code reviews.

Web Developer Intern

Feb 2024 – Apr 2024

Justify Technology Pvt. Ltd. — Mysuru, Karnataka

- Built and maintained responsive web features using HTML5, CSS3, JavaScript, and ReactJS, connected to live RESTful APIs.
- Partnered on UI/UX design reviews and shipped interface improvements, improving compatibility across desktop and mobile.

PROJECTS

Tool-81 – Onboarding Wizard (AI-Powered Web App)

2026

Java, Spring Boot, JWT, PostgreSQL, Redis, ReactJS, Docker

- Built a full user login and account system (signup, JWT login/refresh, password hashing, CRUD operations) with a layered Spring Boot architecture.
- Tested and containerized the app with Docker, Swagger API docs, and Postman collections for integration testing.

Bank Fraud Detection System

2026

Python, KNN, CNN, Logistic Regression, MS SQL Server

- Built a real-time machine learning model in Python to detect fraudulent transactions from behavioral patterns, with automated data preprocessing.
- Published the results in a peer-reviewed research paper, covering the full process from data to a working, deployed solution.

EDUCATION

Master of Computer Applications (MCA) — CGPA: 8.1/10

2024 – 2026

The National Institute of Engineering (NIE), Mysuru — Autonomous under VTU, Belagavi

Bachelor of Computer Applications (BCA) — CGPA: 7.9/10

2021 – 2024

NIE First Grade College, Mysuru, Karnataka

CERTIFICATIONS & PUBLICATIONS

- Machine Learning in Production — Jun 2025
- [Peer-Reviewed Research](#) Paper: "Enhancing Trust in Digital Payments: Benchmarking ML Models for Transactional Fraud Detection" — 2024
